

Greenville, Ohio

ADDRESS | 1175 Martin Street, Greenville, Ohio 45331

START OF OPERATIONS | 1974

LOCATION | Located in Darke County at the intersection of U.S. Route 127 and U.S. Route 36; 35 miles northwest of Dayton; 11 miles east of the Ohio/Indiana border.

SITE MANAGER | Lindsay Narvaez

Products/uses:

- Clearcoat: This is the final coating layer on an automobile. It provides a clear, lustrous and durable finish.
- Electrocoat: This is the first coating layer on an automobile. It provides corrosion protection and prepares the surface for additional coating layers.
- Resins: A variety of resins including acrylics, polyurethanes, polyesters, and epoxies are manufactured at the Greenville site. The resins are used to produce a variety of coatings for automotive (both OEM and refinish) applications.

Community Relations

- BASF is more than just a business or an employer. We are part of a community. We seek to contribute to the health and well-being of the community by contributing to programs that improve the quality of life for residents.
- We have strong ties to our local United Way affiliate, which supports a variety of critical programs within the community, along with Main Street Greenville, Darke Co. Special Olympics, and various local STEM events.

Economic Impact

- 10.5 million euro invested*
- Annual payroll of \$16.2 million*
