than 5 world scale  
manufacturing  
facilities

Hiring locally and  
supporting area  
non-profits

BASF Freeport manufactures products which can be found in more than a thousand different end-use products.

### Products such as:

- Ammonium sulfate used in fertilizer
- Polyamide-6 used in fiber for carpeting and apparel, food packaging film to improve shelf life and light-weight parts for vehicles
- Acrylic monomers are used to produce paints, adhesives, caulks and sealants
- Super absorbent polymers which can be found in baby diapers
- Oxo Alcohol/Polyalcohol products are used to make wood finishes, PVC siding, oils, plastic coatings, and herbicides.
- The Dispersions plant produces architectural coatings, construction chemicals, and adhesives.

### Community relations:

BASF along with local industry neighbors participate in a Community Advisory Panel (CAP) with more than 20 informed citizens representing environmental and community leaders from the Brazosport area.

BASF supports more than 75 organizations including United Way, Brazosport College, the Brazoria Wildlife Refuge, the Brazosport Chamber of Commerce, Boys and Girls Club and Brazosport ISD.

### Local economic impact on Brazoria county:

**More than \$790 million\* spent in our local community.**

*\*Including local purchases, payroll and community giving*
