1. Directors' report

BASF Finance Europe N.V. (hereinafter: the Company) is a 100% subsidiary of BASF SE, a German based and listed Company.

The activities of BASF Finance Europe N.V. involve the founding of, financing of, participating in, managing of, supervision of and contribution of services to companies, as well as performing all commercial, industrial and financial operations.

The Company has no employees and receives services through another BASF Group company.

In 2007 the BASF Group decided to increase the financing activities through the Company. The Company takes loans from and issues notes to the market for internal financing purposes. Currency risks for these loans/bonds, if any, are passed on to other group companies. All loan / note programs are conducted under a guarantee of the ultimate parent Company BASF SE.

On 7 September 2007 the Company established a so-called Debt Issuance Program (hereinafter: DIP)¹. Under this DIP the Company or BASF SE may from time to time issue one or more Notes to a specific number of banks (so-called: Dealers). The maximum aggregate principal amount of the Notes outstanding at one time under the DIP may not exceed EUR 15,000,000,000. Notes issued by the Company under the DIP will have the benefit of a guarantee given by BASF SE. Notes will be issued in such denominations as may be agreed between the issuer and the relevant Dealer and as indicated in the applicable final terms, save that the minimum denomination of the Notes will be EUR 1,000 or an equivalent of that in a different currency. Notes issued under the DIP can be listed for trading on the regulated market of the Luxembourg Stock Exchange and other European stock exchanges.

Notes overview DIP

In 2007, 2008 and 2009 (during the first half of 2010) the following Notes were issued by the Company under the DIP:

<i>Date</i>	<i>Interest rate</i>		<i>€</i>
26 September 2007	5.000%		1,000,000,000
31 October 2007	5.000%		250,000,000
3 June 2008	3.250%	CHF 300,000,000	186,219,739
3 June 2008	3.625%	CHF 200,000,000	124,146,493
4 December 2008	6.000%		1,250,000,000
9 February 2009	5.125%		1,500,000,000
24 February 2009	4.500%		150,000,000
29 May 2009	5.125%		500,000,000
Issued loans			<u>4,960,366,232</u>

¹ More detailed information can be found on the BASF internet site:
<http://www.basf.com/group/corporate/en/investor-relations/bonds-and-credit-rating/index>

Outside DIP

Outside the DIP program, the following notes/loans were issued in 2007 and 2008 (none in 2009 and the first half of 2010) which are also guaranteed by BASF SE.

<i>Date</i>	<i>Interest rate</i>		<i>€</i>
27 June 2007	3-Month Euribor + 0.600%	USD 1,350,000,000	917,057,265
24 September 2008	3-Month Euribor + 0.600%		500,000,000
24 September 2008	3-Month Euribor + 0.600%		54,000,000
Issued loans			<u>1,471,057,265</u>

Result

As a consequence of the increase of issued bonds and notes/received loans and provided loans the result of the Company has improved. The Company has completed the half year with a positive result of EUR 1,366,680 (first half of 2009 EUR 1,101,000).

The fluctuations of the exchange rates for the EURO vs. the US dollar (at the beginning of the year 2010 1.4406 and at 30 June 2010 1.2271) and the Swiss Franc (at the beginning of the year 2010 1.4836 and at 30 June 2010 1.3283) did not have a substantial influence on the Company's result. Similarly the development of interest rates had little impact on the Company's results as the rates on the major part of the financing were fixed. Loans with variable interest rates have a fixed margin. In the financial half year 2010 the Company did not use financial derivatives.

Risk Report

BASF Finance Europe N.V. risk management goal is to identify and evaluate risk as soon as possible and limit business losses by taking suitable measures, thus avoiding risks that pose a threat to the Company's continued existence.

Financial risk

The management of currency and interest rate risks is conducted in the Treasury department of BASF Nederland B.V. Detailed guidelines and procedures exist for dealing with financial risks.

Interest risk

Interest rate risks result from changes in prevailing market interest rates, which can cause a change in the present value of fixed-rate instruments, and changes in the interest payments of variable-rate-instruments. To hedge these risks the interest rates of the assets and the liabilities have the same base. This will offset most of the interest rate risk. The remaining interest results are due to the timing differences between the date on which financing was received and the date on which the loans were issued to the group companies.

Liquidity risk

Risks from cash flow fluctuations are recognized in a timely manner as part of the liquidity planning. The presently increased uncertainties are taken into account by means of additional risk scenarios and the short-term updating of our liquidity planning. This means we can promptly take the necessary measures when required.

Foreign currency risk

Financial foreign currency risks are the result of the translation of receivables, liabilities and other monetary items. These risks are not hedged using derivative instruments.

The fluctuations of the exchange rates for the EURO vs. the US dollar and the Swiss Franc did not have any substantial influence on the result of the Company.

Audit

The financial information included in this half-year report has not been audited by the external auditors.

Responsibility statement

In accordance with article 5:25d of the Financial Markets Supervision Act (Wet op het financieel toezicht), the Board of Management confirms that to the best of its knowledge:

- The financial statements give a true and fair view of the assets, liabilities, financial position and profit and loss of BASF Finance Europe N.V.
- The half year report gives a true and fair view of the position as per 30 June 2010 and the development during the financial year of BASF Finance Europe N.V. and
- The half year report describes the principal risks BASF Finance Europe N.V. is facing.

Arnhem, 9 August 2010

2.4 Notes to the 2010 half year financial statements

2.4.1 General

All amounts are in EUR x 1,000 unless otherwise stated.

2.4.1.1 Ownership

BASF Finance Europe N.V. registered Groningensingel 1, Arnhem, the Netherlands, is a wholly-owned subsidiary of BASF SE in Ludwigshafen, Germany.
The financial data of BASF Finance Europe N.V. are included in the group financial statements of BASF SE in Ludwigshafen, Germany.

2.4.1.2 Activities

The activities of BASF Finance Europe N.V. involve the founding of, financing of, participating in, managing of, supervision of and contribution of services to companies, as well as performing all commercial, industrial and financial operations.

2.4.2 Basis of preparation

The financial statements have been prepared in accordance with Title 9 Book 2 of the Dutch Civil Code. The principles adopted for the valuation of assets and liabilities and determination of the result are based on the historical cost convention.

Income is the difference between interest revenues and expenses, gains or losses on conversion and expenses for the year on a historical cost basis.

2.4.2.1 Accounting principles

The preparation of the financial statements requires the management to form opinions and to make estimates and assumptions that influence the application of principles and the reported values of assets and liabilities and of income and expenditure. The actual results may differ from these estimates. Revisions of estimates are recognised in the period in which the estimate is revised and in future periods for which the revision has consequences.

2.4.3 Financial instruments

Financial instruments generally include loans and (other) receivables, cash items, bonds/notes and other financing commitments.

Financial instruments also include derivative financial instruments (derivatives) embedded in contracts. These derivatives will be separated from the host contract and accounted for as a separate financial instrument if:

- The economic characteristics and risk of the embedded derivative are not closely related to the economic characteristics and risks of the host contract;
- A separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and
- The combined instrument is not measured at fair value with changes in fair value recognized in profit or loss

If derivatives embedded in contracts are not separated from the host contract they are recognized in accordance with the host contract.

Financial instruments, including stand alone derivatives as well as derivatives separated from the host contracts, are initially recognized at fair value. After initial recognition, financial instruments are valued in the manner described below.

Loans granted, other receivables and cash and cash equivalents

Loans, receivables and cash and cash equivalents are measured at amortised cost using the effective interest method, less impairment losses. The loans and receivables with a remaining time to maturity that exceeds 12 months are presented as financial fixed assets. Interest income and expense, based on the effective interest method are accounted for in the net interest margin within the income statement.

Bonds issued, loans received and other payables

Bonds issued, loans and other financial commitments are carried at amortized cost using the effective interest method, less impairment losses.

Other purchased loans and bonds are carried at fair market value provided they are listed on a stock exchange. Changes in the fair value are recognized in the profit and loss account. Unlisted purchased loans and bonds are carried at amortized cost using the effective interest method, less impairment losses.

The short term part of the bonds is shown separately in the balance under other liabilities. The commission costs will be amortized over the term of the loans and added to the book value of the related loans. At maturity date the loans will be stated at their nominal value.

Other payables are stated at face value.

2.4.4 Income tax

Income tax expense comprises current and deferred tax. Income tax expense is recognised in profit or loss except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

2.4.5 Foreign currency transaction

Monetary assets and liabilities denominated in foreign currency are translated into the functional currency (EUR) at the balance sheet date at the exchange rate applying on that date. Non-monetary assets and liabilities in foreign currency that are stated at historical cost are translated into Euro at the applicable exchange rate on the transaction date. Translation gains and losses are taken to the profit and loss account as expenditure.

BASF Finance Europe N.V. has issued bonds, notes and loans. The financing obtained through some of those instruments is denominated in USD and CHF. BASF Finance Europe N.V. in its turn has issued loans to group companies, for the same amount and denominated in the same currency as the aforementioned bonds, notes and loans. As such, the foreign currency risks are passed on to group companies and do not have any impact on the results of BASF Finance Europe N.V. Nevertheless, there is currency exposure due to timing differences between the date on which financing was received and the date on which the loans were issued to group companies. An additional currency exposure exists for the margin BASF Finance Europe N.V. receives on the loans provided to BASF Group companies.

The balance sheet positions denominated in foreign currency are translated at the exchange rate on the balance sheet date.

In the profit and loss account foreign currency amounts translated at monthly average rates. Foreign exchange gains and losses are included in General and administrative expenses.

2.4.6 Notes to the cash flow statement

The cash flow statement has been prepared using the indirect method. The cash and cash equivalents in the cash flow statement comprise the balance sheet items cash at banks and in hand. Cash flows in foreign currency are translated into Euro at the average weighted exchange rates at the dates of the transactions. Receipts and payments of interest, dividends received and corporate income tax are included in the cash flow from operating activities.
