

# McIntosh, Alabama

**ADDRESS** | 1379 Ciba Road, McIntosh, Alabama 36553

**START OF OPERATIONS** | 1952

**LOCATION** | Located in South Alabama, north of Mobile, on Highway 43

**SITE MANAGER** | Marcus Pezent

## Product uses:

- AO (Antioxidant) Production Unit

Antioxidants provide exceptional color and durability to plastics, adds resilience and life to lubricants, engine oils and transmission fluids.

- Light Stabilizers Unit

The two main product families produced in this unit are Tinuvs and HALS (Hindered Amine Light Stabilizers). Tinuvs absorb harmful UV radiation in automotive finishes, protects wood with outdoor stains, and keeps photographic inks vivid. HALS products stop degradation caused by sunlight to plastic containers and outdoor furniture.

## Community Relations

The McIntosh site contributes in several ways to improve the quality of life through community involvement and corporate giving:

- Community Advisory Panel, Manufacture Alabama and Mobile Chamber of Commerce
- Scholarships at Coastal Alabama Community College and the University of South Alabama, internships and co-op's are provided
- Teens' Lab in collaboration with the University of South Alabama
- STEM (Science, Technology, Engineering and Math) grants awarded to teachers in Washington County
- Kids' Lab in collaboration with local non-profit agencies and schools
- United Way of Southwest Alabama, Distinguished Young Women of Washington County, the Arc of Southwest Alabama, MOWA Band of Choctaw Indians, and Washington County Extension Center
- Members of Partners for Environmental Progress

## Economic Impact

- Annual payroll with benefits of \$50.4 million\*
- Payment of \$1.1 million in local and state taxes\*
- Capital expenditure range of \$10-25 million
- Total # of Employees: 268

\*Year-end 2023 data
