

# Liquidity Environmentally Aware Fund (LEAF Cash)

## Fund Objective

The Fund's principal investment objective is to maintain capital and ensure liquidity, while providing a return in line with money market rates. The underlying investment manager, will also take into account environmental considerations when selecting the Fund's investments.

## Fund Features

This fund invests in assets which tend to produce more stable returns. Over the longer term these assets should give lower but steady growth, with some fluctuation in value. In some circumstances, there can be a fall in value. For example, when interest rates are low the return from the assets may be less than the charges. Unless held as part of a personalised portfolio invested to achieve an overall balance of risk and return, this fund is more suited for shorter-term investment. Investing solely in this fund for the medium to longer-term may result in a lower return than a bank or building society savings account.

### Things you need to know

All funds carry some risk and you should consider these risks before making an investment decision. The value of investments and any income from them can fall as well as rise and will be reduced in real terms by the effects of inflation.

The main factors which may increase the risk of this fund include:

- The amount invested in company shares
- The split between government and corporate bonds
- The extent to which the fund invests in high yield assets
- The amount held in overseas assets
- Any concentration in specific areas or sectors
