Annual Press Conference

Ludwigshafen, February 25, 2022

BASF achieves strong earnings growth in full year 2021; EBIT before special items reaches €7.8 billion

- Compared with 2020, EBIT before special items more than doubled to €7.8 billion, mainly due to the very strong performance of BASF's upstream businesses
- In 2021, prices increased by 25% and volumes grew by 11%; all segments achieved price and volume growth
- Compared with 2020, cash flows from operating activities improved by 34% and amounted to €7.2 billion; free cash flow increased by €1.4 billion to €3.7 billion
- Semiconductor shortages continued to weigh on global automotive production and negatively impacted BASF's automotive-related businesses
- Higher raw materials prices, increased energy and logistics costs burdened all segments, especially in Q4 2021

Global chemical production increased by 6.1% in the full year 2021

Chemical production compared with prior year¹ %

BASF Group 2021: Financial targets achieved across the board; progress in achieving nonfinancial targets

Profitable growth

	Target	2021 status
Grow sales volumes faster than global chemical production every year	>6.1%	10.6%

	Target	2021 status
Increase EBITDA before special items by 3% to 5% per year	+3–5%	53%

Effective climate protection

	Target	2021 status
Reduce our absolute CO ₂ emissions ¹ by 25% by 2030 (development of carbon emissions compared with baseline 2018) ²	≤ 16.4 million metric tons	20.2 million metric tons

Profitable growth

	Target	2021 status
Achieve a return on capital employed (ROCE) ³ considerably above the cost of capital percentage every year	> 9%	13.5%

	Target	2021 status
Increase the dividend per share every year based on a strong free cash flow	> €3.30	€3.40

Sustainable product portfolio

	Target	2021 status
Achieve €22 billion in Accelerator sales ⁴ by 2025	€22.0 billion	€24.1 billion

¹ The goal includes Scope 1 and Scope 2 emissions. Other greenhouse gases are converted into CO₂ equivalents according to the Greenhouse Gas Protocol. In March 2021, BASF revised its previous target of CO₂-neutral growth until 2030 (base year 2018: 21.9 million tons CO₂e) to a new, more ambitious climate protection target to reduce absolute CO₂ emissions by 25% compared with 2018 (new target: 16.4 million tons CO₂e).

² 2030 target compared with 1990: 60% CO₂ reduction

³ Return on capital employed (ROCE) is a measure of the profitability of our operations.

We calculate this indicator as the EBIT generated by the segments as a percentage of the average cost of capital basis

⁴ Accelerator products are products that make a substantial sustainability contribution in the value chain.
